

**ALMOTKSS**  
Hangars & Prefab Buildings

Company Profile · 2026

# Almotkss Co. for Hangars & Prefabricated Buildings

Design · Fabrication · Installation

## 01 About the company

Almotkss is one of the leading companies in steel structures and prefabricated buildings. We stay with your project from the first idea and the engineering design, through fabrication in our own factory, all the way to installation and handover.

Our work is supervised by specialist engineers and carried out by highly qualified technical crews, under a management that puts quality and punctuality first. Because our factory is equipped with the latest machinery, we control the quality of every part and the pace of every project — from storage hangars and factories to offices, worker housing and pedestrian bridges.

### Our goal

To keep pace with every advance in steel-structure and prefabricated-building manufacturing — and to take our company into the ranks of the world's leading firms.

**+39,000 m<sup>2</sup>**

Square metres delivered

**16,000 m<sup>2</sup>**

In a single roofing project

**18 m**

Tallest hangar we have built

Major projects completed

### Specialist engineering supervision

Specialist engineers follow every stage — from design and structural calculations to handover.

### Highly skilled crews

Technicians, welders and erection crews with proven skill in fabrication and site work.

### A fully equipped factory

Cutting, bending, welding and assembly in-house — precision and quality in every part.

### Sound management, on schedule

Clear planning and fast execution that respect your time and budget.

## 02 Our services

We design, fabricate and install every type of steel building — sized and specified for your project.

### Industrial hangars & warehouses

Storage hangars, factories and workshops in any area, span and height — structurally engineered for loads and wind.

- ◆ Storage hangars, factories & workshops
- ◆ Heights of 18 m and beyond
- ◆ Wide spans to suit the design
- ◆ Cladding & insulation to suit the use

### Prefabricated houses & buildings

Offices, worker housing, guard rooms and isolation units — built in our factory, installed on site in record time.

- ◆ Site & administrative offices
- ◆ Isolation & guard rooms
- ◆ Worker housing & camps
- ◆ Fast to install, relocatable

### Steel structures & bridges

Pedestrian bridges, mezzanines, canopies, railings and bespoke structures — fabricated precisely to the drawings.

- ◆ Pedestrian bridges
- ◆ Canopies & shades
- ◆ Mezzanines & steel decks
- ◆ Railings & staircases

### Special-specification warehouses

High-performance thermal insulation and antibacterial floors for pharmaceutical, food and sensitive storage.

- ◆ High-efficiency thermal insulation
- ◆ Suited to pharma & food
- ◆ Antibacterial flooring
- ◆ A stable storage environment

### Stores & commercial shops

Practical, well-finished steel-framed stores and shops — delivered in several Libyan cities.

- ◆ Commercial stores
- ◆ Steel façades & doors
- ◆ Shops & showrooms
- ◆ Delivered nationwide

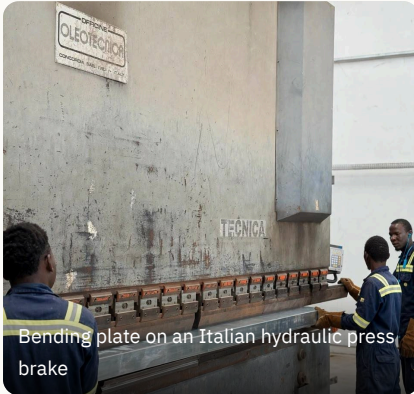

### Roof dismantling, re-installation & retrofit

Dismantling, re-installing and upgrading the roofs of existing hangars at scale — 16,000 m<sup>2</sup> in a single project.

- ◆ Safe, organised dismantling
- ◆ Upgrading existing structures
- ◆ Re-installation & re-sheeting
- ◆ Large areas, fast

## 03 Factory & capabilities

In our Tajoura factory, steel plates and sections become ready-to-erect structures — through modern cutting, bending and welding machines, and overhead cranes for heavy members — so every part is right before it leaves the shop.

Bending plate on an Italian hydraulic press brake

Inside our Tajoura factory

Erection work on site

### Plate bending

Italian-made hydraulic press brakes for accurate plate bending.

### Welding & assembly

Structural welding and assembly under direct engineering supervision.

### Cutting & preparation

Sections and plates cut and prepared to the structural drawings.

### Heavy handling

Overhead cranes move heavy members safely around the shop.

## How we work

01

### Consultation & survey

We listen to your needs, survey the site and define dimensions and use.

02

### Engineering design

Structural drawings and load calculations by specialist engineers.

03

### Fabrication

Cutting, bending, welding and assembly in our factory under strict quality control.

04

### Delivery & erection

Specialist erection crews install on site — quickly and safely.

05

### Handover & support

We hand over a finished project — and stay with you afterwards.
